

tesma: your platform for lifecycle and asset transparency

tesma

tesma is CHG-MERIDIAN's in-house platform, refined over more than twenty years.

It brings together commercial, technical and contractual data for every CHG-leased asset, giving teams one reliable view to manage assets, costs and decisions with confidence.

Who uses tesma

How does it work?

1

Centralises asset data

tesma consolidates commercial, technical and contractual information in one place, creating a single, reliable view of your leased asset estate.

2

Supports every stage of the lifecycle

From procurement and delivery through to contract management, returns and renewals, tesma keeps every lifecycle step aligned and easy to manage.

3

Delivers accurate reporting and audit readiness

Financial data, asset status and documentation are always up to date, supporting strong governance and dependable operational control.

What does it manage?

Procurement

Confirmations

Contracts

Documents

Assets overview

Full lifecycle transparency from order to secure return.

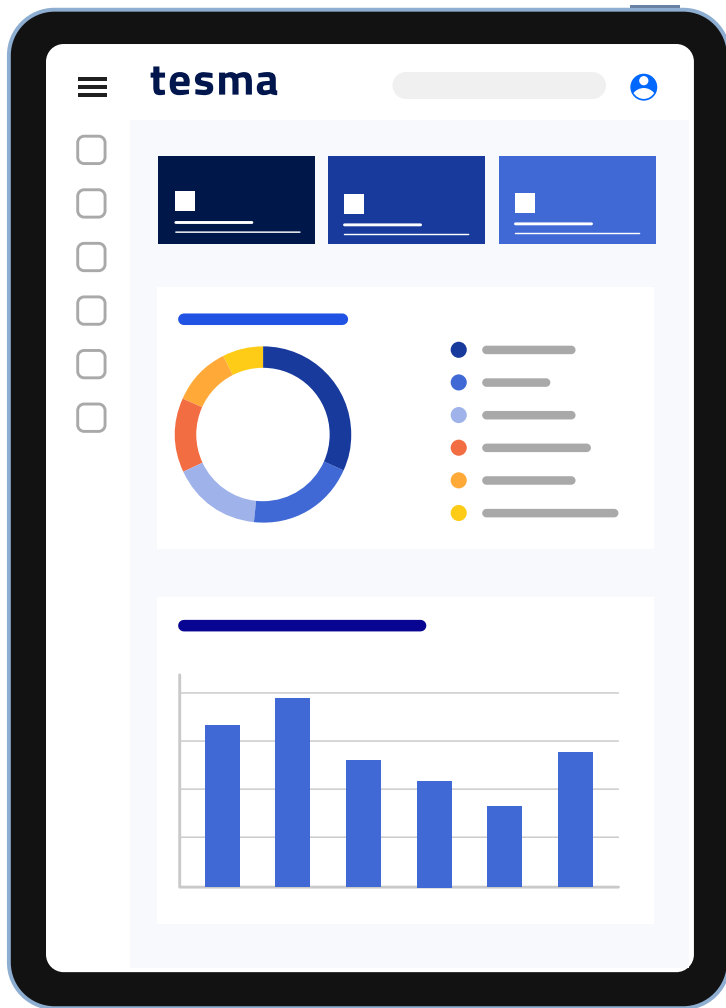

Managing the full technology lifecycle

tesma keeps every phase connected, from the first order through to secure and documented end of life.

Turning data into decisions

tesma turns asset and financial data into clear insight, helping teams plan spend, allocate costs and stay in control.

1. Dashboard visibility

Live insight into assets, contracts, returns and financial status.

2. Cross-charging

Breakdowns by department, location or cost centre.

3. Future rentals

Transparent insight into upcoming financial commitments.

4. Tailored workflows

Approval flows and lifecycle steps that match internal processes.

5. Budgeting and consumption planning

Data to support financial and operational planning.

6. Cost allocation across multiple sites

Consistent information for internal charging and analysis.

How teams use tesma

Finance

Accurate cost allocation, clear future commitments and reliable data to support budgeting, forecasting and governance.

IT

Full visibility of the asset estate, standardised life-cycle management and fewer manual tasks across procurement, changes and returns.

Procurement

Controlled ordering, consistent processes and clear oversight of contracts, suppliers and lease terms.

Operations

Joined-up workflows and up-to-date information that keep day-to-day asset management running smoothly.

Supporting responsible lifecycle management

1. Lifecycle and return visibility

Monitor age, lease status and upcoming returns.

2. Second-life insight

Use return-condition trends to guide refresh cycles and preserve value.

3. On-time collections

Reduce idle stock and support faster redeployment or remarketing.

4. Audit trail

Access collection notes, data-erasure certificates and end-of-life documentation.

5. Data for ESG reporting

Structured asset and contract data that can support sustainability reporting.

tesma strengthens the link between asset decisions and measurable sustainability outcomes.

A platform built for clarity and confidence

tesma supports lifecycle transparency, strong financial governance and responsible asset management.

With reliable data and end-to-end visibility, organisations can plan with confidence and manage their technology estates effectively.
