

Navigate the Change

Achieving a sustainable IT strategy with circular tech

For more than 45 years, CHG-MERIDIAN has embraced the principle of „Usage over ownership,“ combining it with the commitment to actively shape sustainable development.

Our circular business model has the potential to reduce emissions, save resources, and extends the lifecycle of technology. As a tech financing specialist and technology manager, we support our customers throughout the entire lifecycle of their IT and technology devices – from procurement to usage and remarketing – efficiently, environmentally, and with a forward-looking approach.

Our sustainability strategy is an integral part of our corporate strategy. With clearly defined goals and concrete measures, we pursue a holistic, systematic approach that creates impact – both within our own company and along our entire value chain. We do not view sustainability as a one-time goal, but as an ongoing process that encompasses all aspects of sustainable business – economy, ecology, and social responsibility.

Facts and Figures 2025

reduction in greenhouse gas emissions per employee since 2019/2020.

reduction in Scope 1 and 2 emissions by 2034 – such as from buildings and our vehicle fleet: This is the target we have set for ourselves under the SBTi. By 2025, we had already reduced these emissions by 8.6% compared to the previous year.

of CO₂ were reduced as part of the **switch to biogas** at our technology center in Groß-Gerau.

* metric ton

reduction of Scope 3 emissions from capital goods and downstream leased assets per unit of value added by 2034: That is our goal under the SBTi. By 2025, we had already achieved a 12.7% reduction compared to the previous year.

of **leadership** positions at CHG-MERIDIAN are **held by women**.

was **the share of renewable energy** in total energy consumption. Contributing factors include the switch to biogas at our technology center in Groß-Gerau, the transition to green electricity contracts at locations such as Barcelona, and the gradual transition of our vehicle fleet.

of **IT lease returns** were given **a second life**.

Ratings & Certificates

EcoVadis Platinum
With our EcoVadis rating, we are among the top 1% of over 130,000 companies evaluated worldwide.

5 ISO-Certifications cover Europe.

Science Based Targets Initiative SBTi
As part of the Science Based Targets Initiative (SBTi), we are taking responsibility for the climate and have successfully had our science-based short-term climate targets validated.

Carbon Disclosure Project
Greater transparency: Since 2022 we have been participating in the Carbon Disclosure Project (CDP) – one of the world's leading environmental rating organizations.
